

Lift drive JMB-L

Description:

This graceful designed electrical lift drive accommodated in a sturdy aluminium housing is suitable to open roof flaps. The construction as well as the extensive accessories make the lift drive also suitable for diverse usage options. The lift drive is equipped with a relay for parallel use.

Function:

The lift drive is equipped with a maintenance-free spindle but isn't suitable for an outdoor installation.

The actuator gets switched off in both final positions.

Lamp indication is possible in both final positions.
