

# Manual override with Handwheel HGC

The manual override series HGC is used as a manual operation for valves or as an intermediate gear. The gearboxes can be used for the electric actuator series AN40, AN100 and AN300 as well as for the pneumatic actuator series PAG.

Variant	B.-No.	Reduction i	MD Nm	SW both sides mm	Mounting holes both sides	A mm	B mm	H mm	L mm	Ø HR mm	Weight kg
HGC-50		40:1	300	14	F05 / F07	90	110	100	207	200	2,3
HGC-70		38:1	360	17	F07 / F10	135	125	119	270	200	3,5
HGC-102		36:1	810	22	F10 / F12	140	140	119	280	300	5,6
